

AMENDMENTS TO THE CLAIMS

1. (Currently Amended) A encapsulated ~~Encapsulated~~ blister package, ~~characterised~~
~~in that it has comprising:~~

a flat outer casing (1) ~~having open~~ at least one opening from one side[[,]]; and

an inner part (2) ~~having a base bound to the outer casing and being at least partly~~
~~extractable~~[[,]]; and

a disc formed as a blister package, wherein

the inner part is disposed in the outer casing so that the inner part is slidably extractable at
least partly from the opening of the outer casing,

~~the inner part comprising a disc (7) formed as a blister package is fitted rotatably onto a the~~
~~base of the inner part (5) and, which~~

the base has an outlet opening (9) below the disc so that products (8) brought to the
opening by rotating the disc can be released from the disc by pressing ~~the~~ a respective blister
(15) and removed from the package through the opening.

2. (Currently Amended) The package ~~Package~~ according to claim 1, ~~characterised in~~
~~that wherein~~ the casing (1) and/or the inner part (2) is provided with a retainer (11, 12),
preventing the inner part from becoming loose from the casing.

3. (Currently Amended) The package ~~Package~~ according to claim 1 or 2,
~~characterised in that wherein~~ the disc (7) ~~consists of~~ comprises a blister sheet (13) of flexible

plastics, and a bottom (14) made of flexible material, such as foil paper, which breaks when the product (8) is released by pressing.

4. (Currently Amended) The package ~~Package~~ according to claim 1, ~~characterised in that wherein~~ the disc (7) contains individual products (8) arranged to form an arc of a circle or a ring so that they can be brought to the outlet opening (9) or like in the base (5) one at a time by rotating the disc.

5. (Currently Amended) The package ~~Package~~ according to claim 4, ~~characterised in that wherein~~ the products (8) are arranged as several concentric arcs or rings in the disc (7).

6. (Currently Amended) The package ~~Package~~ according to claim 1, ~~characterised in that wherein~~ the products (8) are arranged as a spiral in the disc (7).

7. (Currently Amended) The package ~~Package~~ according to claim 1, ~~characterised in that wherein~~ the base (5) is provided with a longitudinal outlet opening (9), extending in the direction of the radius of the disc (7).

8. (Currently Amended) The package ~~Package~~ according to claim 1, ~~characterised in that wherein~~ the disc (7) and/or the base (5) contains a hindrance, which allows the disc to rotate to one direction only.

9. (Currently Amended) The package ~~Package~~ according to claim 1, ~~characterised in that wherein~~ the disc (7) comprises a sector (19), which is free of the packed products (8), and that in an unopened package, said sector is located at the outlet opening (9) in the base (5).

10. (Currently Amended) The package ~~Package~~ according to claim 1, ~~characterised in that wherein~~ the disc (7) is articulated onto the base (5) from its middle section (6).

11. (Currently Amended) The package ~~Package~~ according to claim 1, ~~characterised in that wherein~~ the extractable inner part (2) comprises a base (5) and a projection (20) extending from its side (10) above the disc (7) for keeping the disc in place on the base.

12. (Currently Amended) The package ~~Package~~ according to claim 11, ~~characterised in that wherein~~ the disc (7) rests freely on the base (5) so that it can be rotated by fingers.

13. (Currently Amended) Package according to claim 11, ~~characterised in that wherein~~ the projection is formed as an annular rim (20) encircling the circumference of the disc (7).

14. (Currently Amended) The package ~~Package~~ according to claim 12 ~~13~~, ~~characterised in that wherein~~ the rim (20) has a tongue (24), ~~extending which extends~~ towards the centre of the disc (7), ~~at which a blister (15) in the disc (7) is left under the rim so that the~~ tongue can cover a blister.

15. **(Currently Amended)** ~~The package~~ Package according to claim 8 ~~14~~, ~~characterised~~
~~in that wherein the rim (20) has beside the tongue (24) has~~ at least one fin (25) directed down
towards the disc (7), turning to only one direction ~~only~~ so that, in cooperation with a blister (15),
it allows the disc to rotate to only one direction ~~only~~.

16. **(Currently Amended)** ~~The package~~ Package according to claim 1, ~~characterised in~~
~~that wherein~~ the outer casing (4) and the base (5) of the inner part are made of packaging board.

17. **(Currently Amended)** ~~The package~~ Package according to claim 1, ~~characterised in~~
~~that wherein~~ the package is a medicine package containing tablets (8), capsules or pills.
